

# THE GEBERIT METERING FAUCET

The metering faucet where performance is unaffected by water pressure and/or volume.

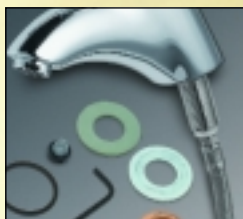

## Specialized Advantages:

- Solid brass construction for long life and vandal resistance
- Makes user complaints, contractor callbacks and erratic water consumption a thing of the past
- Separate, hydraulically controlled self-closing system needs only minimum pressure to operate at maximum efficiency
- Easily adjusted for flow time, water volume and temperature for maximum control over water usage
- Run time default setting is 8 seconds
- Adjustable from 3 to 30 seconds with simple tools
- Supply line and vacuum breaker system (provided) threads directly to standard stop valve for easy hook-up
- Single supply line unit without mixer
- No battery or AC power required
- Innovative cascade aerator minimizes lime scale buildup
- Vandal resistance is standard equipment
- Twist-resistant pushbutton actuator
- Meets ADA requirements

**Applications:** Budget-conscious commercial and institutional facilities, child care, service stations and other cost sensitive applications.

*Hydraulically controlled, self-closing system operates with minimum water pressure.*

*Supply line and vacuum breaker system threads directly to standard stop valve for easy hook-up.*
